## Different Inflation Measures, Different Purposes

The inflation measure most often mentioned in the media is the Consumer Price Index for All Urban Consumers (CPI-U), which tracks the average change in prices paid by consumers over time for a fixed basket of goods and services. In setting economic policy, however, the Federal Reserve Open Market Committee focuses on a different measure of inflation — the Personal Consumption Expenditures (PCE) Price Index, which is based on a broader range of expenditures and reflects changes in consumer choices. More specifically, the Fed focuses on "core PCE," which strips out volatile food and energy categories that are less likely to respond to monetary policy. Over the last 10 years, core PCE prices have generally run below the Fed's 2% inflation target.

# Key Retirement and Tax Numbers for 2021

Every year, the Internal Revenue Service announces cost-of-living adjustments that affect contribution limits for retirement plans and various tax deduction, exclusion, exemption, and threshold amounts. Here are a few of the key adjustments for 2021.

## Estate, Gift, and Generation-Skipping Transfer Tax

- The annual gift tax exclusion (and annual generation-skipping transfer tax exclusion) for 2021 is \$15,000, the same as in 2020.
- The gift and estate tax basic exclusion amount (and generation-skipping transfer tax exemption) for 2021 is \$11,700,000, up from \$11,580,000 in 2020.

## Standard Deduction

A taxpayer can generally choose to itemize certain deductions or claim a standard deduction on the federal income tax return. In 2021, the standard deduction is:

- \$12,550 (up from \$12,400 in 2020) for single filers or married individuals filing separate returns
- \$25,100 (up from \$24,800 in 2020) for married individuals filing joint returns
- \$18,800 (up from \$18,650 in 2020) for heads of households

The additional standard deduction amount for the blind or aged (age 65 or older) in 2021 is:

- \$1,700 (up from \$1,650 in 2020) for single filers and heads of households
- \$1,350 (up from \$1,300 in 2020) for all other filing statuses

Special rules apply if you can be claimed as a dependent by another taxpayer.

## IRAs

The combined annual limit on contributions to traditional and Roth IRAs is \$6,000 in 2021 (the same as in 2020), with individuals age 50 and older able to contribute an additional \$1,000. The limit on contributions to a Roth IRA phases out for certain modified adjusted gross income (MAGI) ranges. For individuals who are covered by a workplace retirement plan, the deduction for contributions to a traditional IRA also phases out for certain MAGI ranges. (The limit on nondeductible contributions to a traditional IRA is not subject to phase-out based on MAGI.)

## MAGI Ranges: Contributions to a Roth IRA

	2020	2021
Single/Head of household	\$124,000–\$139,000	\$125,000–\$140,000
Married filing jointly	\$196,000–\$206,000	\$198,000–\$208,000
Married filing separately	\$0–\$10,000	\$0–\$10,000

## MAGI Ranges: Contributions to a Traditional IRA

	2020	2021
Single/Head of household	\$65,000–\$75,000	\$66,000–\$76,000
Married filing jointly	\$104,000–\$124,000	\$105,000–\$125,000

The 2021 phaseout range is \$198,000–\$208,000 (up from \$196,000–\$206,000 in 2020) when the individual making the IRA contribution is not covered by a workplace retirement plan but is filing jointly with a spouse who is covered. The phaseout range is \$0–\$10,000 when the individual is married filing separately and either spouse is covered by a plan.

## Employer Retirement Plans

- Employees who participate in 401(k), 403(b), and most 457 plans can defer up to \$19,500 in compensation in 2021 (the same as in 2020); employees age 50 and older can defer up to an additional \$6,500 in 2021 (the same as in 2020).
- Employees participating in a SIMPLE retirement plan can defer up to \$13,500 in 2021 (the same as in 2020), and employees age 50 and older can defer up to an additional \$3,000 in 2021 (the same as in 2020).

## Kiddie Tax: Child's Unearned Income

Under the kiddie tax, a child's unearned income above \$2,200 in 2021 (the same as in 2020) is taxed using the parents' tax rates.

# Sequence Risk: Preparing to Retire in a Down Market

"You can't time the market" is an old maxim, but you also might say, "You can't always time retirement."

Market losses on the front end of retirement could have an outside effect on the income you receive from your portfolio by reducing the assets available to pursue growth when the market recovers. The risk of experiencing poor investment performance at the wrong time is called *sequence risk* or *sequence-of-returns risk*.

## Dividing Your Portfolio

One strategy that may help address sequence risk is to divide your retirement portfolio into three different "baskets" that could provide current income, regardless of market conditions, and growth potential to fund future income. Although this method differs from the well-known "4% rule," an annual income target around 4% of your original portfolio value might be a reasonable starting point, with adjustments based on changing needs, inflation, and market returns.

**Basket #1: Short term (1 to 3 years of income).** This basket holds stable liquid assets such as cash and cash alternatives that could provide income for one to three years. Having sufficient cash reserves might enable you to avoid selling growth-oriented investments during a down market.

**Basket #2: Mid term (5 or more years of income).** This basket — equivalent to five or more years of your needed income — holds mostly fixed-income securities, such as intermediate- and longer-term bonds, that have moderate growth potential with low or moderate volatility. It might also include some lower-risk, income-producing equities.

The income from this basket can flow directly into Basket #1 to keep it replenished as the cash is used for living expenses. If necessary during a down market, some of the securities in this basket could be sold to replenish Basket #1.

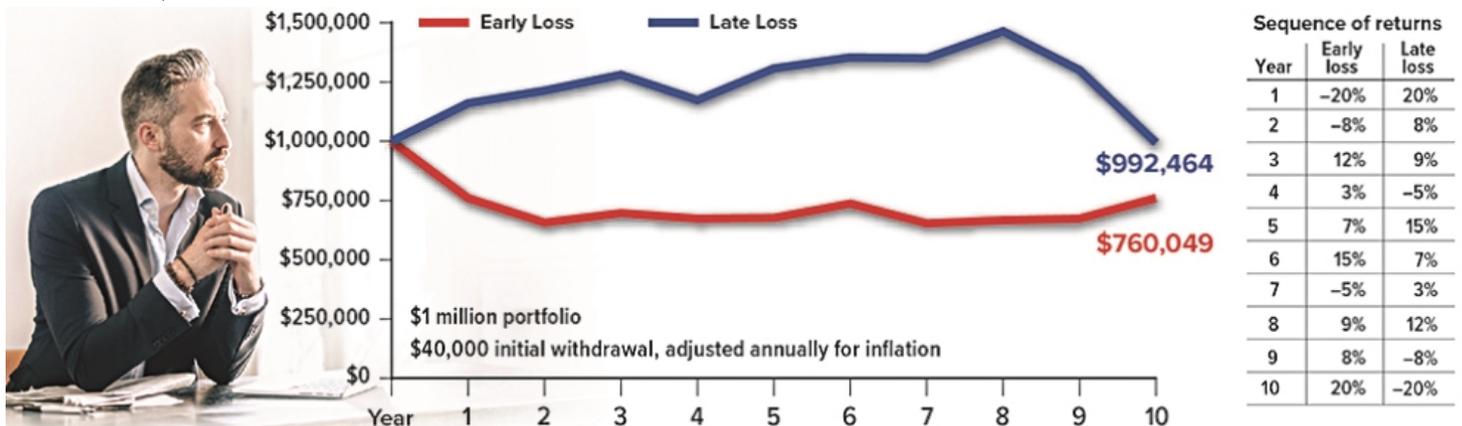

**Basket #3: Long term (future income).** This basket is the growth engine of the portfolio and holds stocks and other investments that are typically more volatile but have higher long-term growth potential. Investment gains from Basket #3 can replenish both of the other baskets. In a typical 60/40 asset allocation, you might put 60% of your portfolio in this basket and 40% spread between the other two baskets. Your actual percentages will depend on your risk tolerance, time frame, and personal situation.

With the basket strategy, it's important to start shifting assets before you retire, at least by establishing a cash cushion in Basket #1. There is no guarantee that putting your nest egg in three baskets will be more successful in the long term than other methods of drawing down your retirement savings. But it may help you to better visualize your portfolio structure and feel more confident about your ability to fund retirement expenses during a volatile market.

*All investments are subject to market fluctuation, risk, and loss of principal. Asset allocation does not guarantee a profit or protect against investment loss. The principal value of cash alternatives may be subject to market fluctuations, liquidity issues, and credit risk. Bonds redeemed prior to maturity may be worth more or less than their original cost. Investments seeking to achieve higher yields also involve higher risk.*

## Early Losses

A significant market downturn during the first two years of retirement could make a big difference in the size of a portfolio after 10 years, compared with having the same downturn at the end of the 10-year period. Both scenarios are based on the same returns, but in reverse order.

Assumes a \$40,000 withdrawal in Year 1, with subsequent annual withdrawals increased by an inflation factor of 2%. This hypothetical example of mathematical principles is used for illustrative purposes only and does not represent the performance of any specific investment. Fees, expenses, and taxes are not considered and would reduce the performance shown if they were included. Actual results will vary.

# Tax Filing Information for Coronavirus Distributions

In March 2020, Congress passed the Coronavirus Aid, Relief, and Economic Security (CARES) Act. The legislation included a provision that allowed qualified retirement plan participants and IRA account holders to take penalty-free early distributions totaling no more than \$100,000 between January 1 and December 31, 2020. If you took advantage of this measure, here's what you need to know for tax filing.

## What Is a Coronavirus Distribution?

In order for a distribution to be qualified under the CARES Act, it must have been made to a qualifying individual before December 31, 2020. You qualify if you, your spouse, or dependents were diagnosed with the virus, or if you, your spouse, or someone who shares your principal residence experienced a pandemic-related financial setback as a result of:

- A quarantine, furlough, layoff, or reduced work hours
- An inability to work due to lack of child care
- Owning a business forced to close or reduce hours
- Reduced pay or self-employment income
- A rescinded job offer or delayed start date for a job

## The Three-Year Rules

A key provision in the Act allows the distribution(s) to be spread "ratably" over three years for purposes of calculating tax payments. In other words, the total can be reported in equal amounts on your 2020, 2021, and 2022 tax returns. For example, if you received a

\$15,000 distribution, you could report \$5,000 in income for each of the three years. However, if you prefer, you can generally report the entire distribution in your 2020 tax filing.

Another provision allows you to repay all or a part of your coronavirus distribution to an eligible retirement plan within three years from the day after the date the distribution was received. Repayments will be treated as if you enacted a trustee-to-trustee transfer, and no federal income taxes will be owed. (A repayment to an IRA is not considered a rollover for purposes of the one-rollover-per-year rule.)

If you pay your income taxes prior to repaying the distribution, your repayment will reduce the amount of the distribution income you report in a subsequent year. Or instead, you may file an amended return, depending on your specific situation.

Consider speaking with a tax professional before making any final decisions.

## How to Report Distribution Income

If you received a coronavirus distribution(s) in 2020, you should use Form 8915-E, Qualified Disaster Retirement Plan Distributions and Repayments, to report the income as part of your 2020 federal income tax filing. You can also use this form to report any recontributed amounts.
